(54) Title: PRINTER WITH CODE SENSOR

(57) Abstract: A printer (1010) for printing user information is provided with one or more sensors (1018, 1020) for detecting machine-readable information pre-printed or pre-formed on the substrate (1012) printed upon. The information uniquely identifies each substrate from other substrates and this information is associated with information relating to the user information. Use of pre-printed or pre-formed substrates allows use of any printing technology for the printing mechanism (1016).

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
