

ABSTRACT

Title of Invention: FOREIGN OBJECT REMOVAL APPARATUS AND PANEL
TREATMENT APPARATUS

A foreign object removal apparatus and a panel treatment apparatus that can remove foreign objects by a simple configuration are provided. A foreign object removal apparatus 40 has a hopper portion 42 into which fragments are input, an input amount adjuster 45 disposed under the hopper portion 42, a chute portion 50 disposed under the input amount adjuster 45, and a sieving section 55 that is disposed under the chute portion 50 and sieves the fragments into glass pieces and foreign objects. The sieving section 55 has a belt portion 64 on which a plurality of protrusions 66 protrudes, and inclines obliquely upward. The glass pieces pass between the protrusions 66 and move downward on the inclination. The foreign objects get caught on the protrusions 66 and move upward on the inclination.
