

Abstract

STORAGE AND RETRIEVAL UNIT FOR A HIGH-BAY WAREHOUSE

- 5 The invention relates to a storage and retrieval unit 1 for a high-bay warehouse 2. Due to the pivotability and vertical movability of the load accepting means 14 in relation to the frame 11 of the storage and retrieval unit 1 outside the guide 13 of the load accepting means 14, a misalignment of a storage item 3 during a transfer process can be compensated for.
