(54) Title: ELECTRICAL HAIR BUFFING APPARATUS

(57) Abstract: A hair-removing and exfoliating device (100) is provided with a pair of counter-rotating abrasive surfaces (128, 134) for pressing against the skin to abrade hair there-from and to exfoliate the skin. The surfaces (128, 134) may be adapted for continual alternating movement in counter-rotating directions at the surface of the skin. In the preferred embodiment, two concentric counter-rotating abrasive surfaces (214, 216) are provided, one rotating clockwise and the other rotating counterclockwise.
