

METHOD FOR PRODUCING HETEROCYCLIC DERIVATIVE

ABSTRACT

[Object] To provide a production method for a heterocyclic derivative.

[Solution] A production method is a production method for a p-toluenesulfonate of a compound represented by the following formula (I), the production method including a step of converting an N,N-dimethylacetamide solvate of the compound represented by the following formula (I) into the p-toluenesulfonate of the compound represented by the following formula (I).
