(54) Title: PROCESS FOR PRODUCING HYDROCARBON PRODUCTS

Fig.1

(57) Abstract: The invention relates to a process for producing hydrocarbon products from plastics material, the process comprising the following steps: (A) Providing the plastics material, wherein the plastics materials comprises a triarylphosphite compound; (B) Depolymerizing the plastics material at a temperature of at least 360 °C to generate a hydrocarbon stream (27); and (C) Separating the hydrocarbon stream (27) into a heavy product (28) and a light product (30), wherein the light product (30) has a boiling range with a final boiling point between 360 °C and 430 °C.
