

1 **ABSTRACT OF DISCLOSURE**

2 A container includes a base, two supporting elements attached to the
3 base along an edge of the base, two other supporting elements attached to
4 the base along an opposite edge of the base and a covering device for
5 covering the base. A flat object can be supported on the supporting
6 elements. Each of the supporting elements includes a primary rounded
7 tooth and a shorter auxiliary rounded tooth separated from the primary
8 rounded tooth. The primary rounded teeth are located further from one
9 another than the auxiliary rounded teeth are from one another as shown in
10 Fig. 2.
