(54) Title: CABLE CLAMP

(57) Abstract: A cable clamping unit for clamping an electrical cable including: a first and second mating units for clamping around the cable, each of the mating units further including a soft sleeve for engaging the cable, the sleeves being at least semi permanently attached to a corresponding mating unit. Also, a cable clamp comprising: a busbar securing portion for securing the cable clamp to a busbar; a first mating unit comprising a first cable locating formation; at least two securing nuts comprising a threaded portion for engaging said attachment bolts and also engaging at least two respective securing bolts; and a second mating unit comprising a second cable locating formation and adapted to engage with said first mating unit thereby to securely clamp an electrical cable located between respective first and second locating formations of the first and second mating units.
