

[ABSTRACT]

[Title of Invention] PATCH

The present invention provides a patch comprising a
5 backing layer and an adhesive agent layer, wherein

the adhesive agent layer is non-aqueous,

the adhesive agent layer contains nonylic acid
vanillylamide and aluminum hydroxide,

a content of nonylic acid vanillylamide in the adhesive
10 agent layer is 0.01 to 0.025% by mass based on a total mass
of the adhesive agent layer,

a content of aluminum hydroxide in the adhesive agent
layer is 0.55 to 1.5% by mass based on the total mass of the
adhesive agent layer, and

15 a mass ratio of the content of nonylic acid
vanillylamide to the content of aluminum hydroxide ((content
of nonylic acid vanillylamide) : (content of aluminum
hydroxide)) in the adhesive agent layer is 1:27 to 1:150.
