(54) Title: CHEMICAL COMPOUNDS

(57) Abstract

The invention concerns the use of a compound of formula (I), in which Z, X, T, A, R^1, R^2, p and q have any of the meanings defined herein, and their pharmaceutically acceptable salts or *in vivo* hydrolysable esters, in the treatment of a disease or condition mediated by monocyte chemoattractant protein-1 (MCP-1). Certain of the components of formula (I) are novel and are provided, together with pharmaceutical compositions thereof, as further features of the invention.
