CLAIMS

1. Use of a traditional Chinese medicine composition comprising Radix Astragali, Radix Paeoniae Rubra, and Fructus Psoraleae in preparation of a medicament for preventing and treating lung damage caused by coronavirus infection (SARS-CoV-2).

2. Use of a traditional Chinese medicine composition comprising Radix Astragali, Radix Paeoniae Rubra, and Fructus Psoraleae in preparation of a medicament for preventing and treating pneumonia caused by coronavirus infection (SARS-CoV-2).

3. Use of a traditional Chinese medicine composition comprising Radix Astragali, Radix Paeoniae Rubra, and Fructus Psoraleae in preparation of a medicament for preventing and treating pulmonary fibrosis caused by coronavirus infection (SARS-CoV-2).

4. Use of a traditional Chinese medicine composition comprising Radix Astragali, Radix Paeoniae Rubra, and Fructus Psoraleae in preparation of a medicament for improving exercise endurance in convalescence from coronavirus infection.

5. Use of a traditional Chinese medicine composition comprising Radix Astragali, Radix Paeoniae Rubra, and Fructus Psoraleae in preparation of a medicament for improving respiratory functions and relieving fatigue in convalescence from lung damage after coronavirus infection (SARS-CoV-2), wherein the traditional Chinese medicine composition is prepared by a process comprising: cutting Radix Astragali into slices and pulverizing Radix Paeoniae Rubra and Fructus Psoraleae into coarse powders, soaking the slices and the powders in ethanol, performing percolation extraction, collecting a percolate and subjecting the percolate to concentration under reduced pressure to afford a fluid extract, vacuum drying the fluid extract to obtain a dry extract, and pulverizing the dry extract into an extract powder; and blending the extract powder with starch to obtain a homogeneous mixture, granulating the mixture by adding 90% ethanol, drying the granulated particles, and preparing a capsule, a tablet, a granule or a pill by using the granulated particles as prepared above and a pharmaceutically acceptable carrier.

6. The use according to any one of claims 1 to 5, wherein the traditional Chinese medicine composition comprises 50 to 100 parts of Radix Astragali, 50 to 100 parts of Radix Paeoniae Rubra, and 25 to 50 parts of Fructus Psoraleae.

7. The use according to claim 6, wherein the traditional Chinese medicine composition is made from 72 parts of Radix Astragali, 72 parts of Radix Paeoniae Rubra, and 36 parts of Fructus Psoraleae.
