

ABSTRACT

APPARATUS AND METHOD FOR A TURRET TEST

5 Disclose herein are a turret test method and apparatus. The turret
test method includes rotatably installing a turret at an adjacent structure,
installing a winding drum, the winding drum being disposed in a rotation
direction of the turret and rotating along with the turret, winding both parts of
a rope about the winding drum in the same direction about a rotation axis of
10 the turret, and providing tension to the rope.
