(54) Title: NOVEL PROCESS AND INTERMEDIATE FOR THE PREPARATION OF APALUTAMIDE

(57) Abstract: The present invention relates to novel highly efficient and economic process for large-scale production of Apalutamide. The present invention also relates to novel process that form highly pure Apalutamide through a novel intermediate. This process avoids use of expensive and hazardous reagents and solvents. Along with the ease of performance, the present invention process also gives high-purity final product with high yield. This makes the present invention highly cost-effective and time-efficient.
