(54) Title: NETWORK ANALYTICS TRACING, AND ROLLBACK FOR STABLE CONSUMPTION OF ANALYTICS OUTPUT

FIG. 3

(57) Abstract: The present disclosure relates to a new generation mobile network, e.g., a 5G mobile network, and to the generation of analytics information in the mobile network. In particular, this disclosure is concerned with tracing an analytics ID or one or more analytics outputs for the analytics ID. Further, the disclosure is concerned with an inference or training rollback for an unstable analytics ID or for at least one unstable analytics output for the analytics ID. To this end, disclosure presents a network analytics tracing entity configured to obtain an indication with information to activate a tracing of one or more analytics outputs for an analytics ID, and/or a tracing of the analytics ID, and configured to provide a rollback notification including one or more rollback actions related to the analytics ID, if at least one output for the analytics ID is unstable and/or if the analytics ID is unstable. The disclosure further provides a network analytics tracing entity and network analytics training entity configured to obtain and perform one or more rollback actions.
