(54) Title: CONTAINER AND APPLICATOR

(57) Abstract: A small slender container and an applicator (4) is used to store a small quantity of substance (2), such as creams, lotions, and make-ups, in a sealed environment and easily and sanitarly dispenses its contents for application as desired. The small slender container comprises an elongated housing (1). The contents of the housing (1) may be permanently sealed with an opening means (7) or may be sealed with a high viscosity sealer (3) such as silicone. The elongated housing (1) has a sealed first end and a second end with a high viscosity sealer (3) to seal the substance (2) within the housing (1). The applicator (4) is inserted into the housing (1) to simultaneously extract and inject the content into the contents into the applicator (4). The applicator (4) may then be used to apply the contents to the desired location. After application, the sealed housing (1) and the applicator (4) are disposed of.
