

TOOLING ASSEMBLY FOR POSITIONING AIRFOILS OF A ROTARY MACHINE

ABSTRACT

A tooling assembly 10 for use with apparatuses 12,54 for propelling a stream of particles at the tip 46 of a rotor blade, a stator vane is disclosed.

- 5 Various construction details are developed which enable the use of the assembly with either apparatus. In one embodiment, the wall 36 of a rotatable fixture 32 shields part of the rotor blade or stator vane.
