

ABSTRACT

The present application provides a session information processing method and apparatus, an electronic device, and a readable storage medium. The session information processing method comprises: receiving a first user input for a target recipe interface; in response to the first input, displaying a target interface, content of the target interface being associated with a target recipe; receiving a second user input for the target interface, the second input being used for inputting target session information; and in response to the second input, outputting target response information, wherein the target response information is determined according to the target session information and a first database, and the first database is associated with the target recipe.
