(54) Title: BIOMETRIC ANONYMIZER SYSTEM AND METHOD

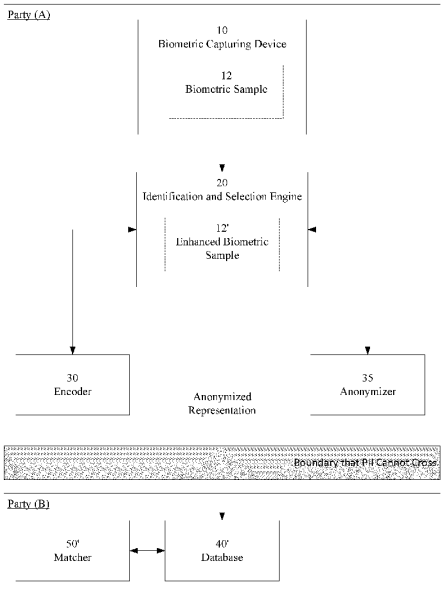

FIG. 2

(57) Abstract: In an aspect, the present disclosure provides a system and method for anonymizing data, which may include receiving biometric data having personally identifiable information associated with a person; encoding a record with a plurality of biometric identifiers of the biometric data, each of the plurality of biometric identifiers comprising a numeric value, and generating an anonymized record based on transforming the numeric value of each of the plurality of biometric identifiers, the anonymized record being disassociated from the personally identifiable information. Aspects of the present disclosure further provide for comparing and matching anonymized data.
