(54) **Title**: SYSTEMS AND METHODS FOR GLOBAL TRANSFERS

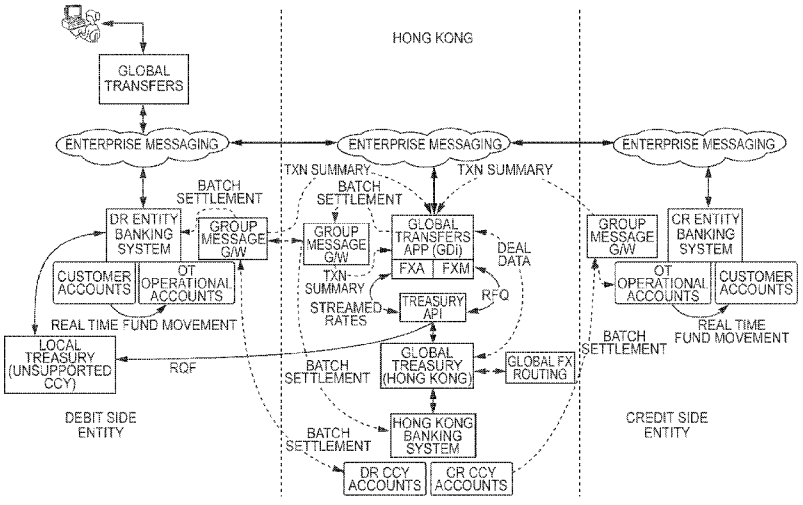

FIG. 1

(57) **Abstract**: A global transfers computer system is configured to facilitate global transfers for customers having a plurality of accounts with different entities in different countries. The global transfer may be a foreign exchange (FX) transfer or a non-FX transfer. The global transfers computer system includes a customer database, a user interface, and at least one computer implementing a global customer data computer application, a global transfers computer application, and/or a foreign exchange computer application. Various embodiments are described, including a computer implemented method for performing global transfers using a global transfers computer system.
