

METHOD AND APPARATUS FOR DETERMINING TERMINAL PROFILE, DEVICE, STORAGE MEDIUM, AND SYSTEM

ABSTRACT

5 This application discloses a method and an apparatus for determining a terminal profile, and
a device, a storage medium, and a system, ~~and belongs to the field of communications technologies.~~
In this application, a data detector may detect one or more first terminals for a plurality of times,
to determine a plurality of groups of profile detection data. In this way, a data analyzer may
determine a reference terminal profile based on the plurality of groups of profile detection data. In
other words, in this application, a terminal is detected online, to accurately determine a
10 corresponding terminal profile on the basis of minimized overheads, and different terminal profiles
can be further determined for different category information, to adapt to a category of the terminal.
