- (54) Title: AIRCRAFT CARGO DOOR SHIELD

FIG.1

(57) Abstract: An aircraft cargo door shield re-
leasably attachable to an aircraft cargo door and
configured for protecting an aircraft cargo door
during loading and unloading of cargo. The air-
craft cargo door shield includes a panel con-
figured for covering a portion of an external
skin of the cargo door, and one or more fasten-
ing or attachment mechanisms configured for
releasably holding the panel adjacent to the
cargo door during use. The aircraft cargo door
shield may include upper attachment mecha-
nisms having elongated hooks that may engage
an upper edge of the aircraft cargo door. Some
or all of the attachment mechanisms may be
coupled to tension members to retain the en-
gagement of the attachment mechanisms to the
aircraft cargo door during use.
