DOSING OF MUSCLE TARGETING COMPLEXES FOR TREATING DYSTROPHINOPATHIES

ABSTRACT

Aspects of the disclosure relate to methods of promoting expression or activity of a dystrophin protein and/or methods of treating DMD in a subject. In some embodiments, the methods comprise administering to the subject a composition comprising complexes (e.g., muscle targeting complexes) comprising a phosphorodiamidate morpholino oligomer (*e.g.*, useful for targeting DMD) covalently linked to an antibody (*e.g.*, anti-TfR1 antibody).
