(54) Title: PERIPHERAL INTRAVENOUS CATHETER ASSEMBLY HAVING AN EXTENSION SET

FIG. 1A
(Prior Art)

(57) Abstract: A catheter assembly may include a catheter adapter, which may include a proximal end, a distal end, a lumen extending through the proximal end and the distal end, and a side port. The catheter assembly may include an extension set, which may include a first extension tube that may extend from the side port. The extension set may include a first connector, which may be coupled to a proximal end of the first extension tube. The first connector may include a first port and a second port. The extension set may also include a second extension tube. A distal end of the second extension tube may be coupled to the first port. The second extension tube may be longer than the first extension tube. The extension set may include a second connector, which may be coupled to the proximal end of the second extension tube.
