

ABSTRACT

FIXED COVER, FRONT COVER, AND RAIL VEHICLE

A fixed hood, a front hood and a rail vehicle. The fixed cover comprises a mounting frame (1) and a fixed cover body, and the mounting frame (1) is configured to be detachably connected to a vehicle front end bearing structure; the fixed cover body is provided outside the mounting frame (1); the fixed cover body comprises a top cover body (2), a bottom cover body (4) and two side cover bodies (3) which are separately provided; the top cover body (2), the bottom cover body (4) and the two side cover bodies (3) are detachably connected to the mounting framework (1), separately; the two side cover bodies (3) are symmetrically provided between the top cover body (2) and the bottom cover body (4), such that the top cover body (2), the two side cover bodies (3) and the bottom cover body (4) define a front end opening (5).
