

Preventive Agents against Adhesion of Marine Organisms and Methods  
of Preventing Such Adhesion of Marine Organisms.

ABSTRACT OF THE DISCLOSURE

A preventive agent against adhesion of a marine organism comprising: at least one amine compound represented by the following formula (I):

, wherein R is a C<sub>8-22</sub> saturated or unsaturated aliphatic hydrocarbon group, R<sup>1</sup> is hydrogen atom, aminopropyl, a C<sub>1-22</sub> saturated aliphatic hydrocarbon or C<sub>2-22</sub> unsaturated aliphatic hydrocarbon group, R<sup>2</sup> is aminopropyl, a C<sub>1-8</sub> saturated aliphatic hydrocarbon or C<sub>2-8</sub> unsaturated aliphatic hydrocarbon group, provided that R<sup>1</sup> is hydrogen atom or aminopropyl group when R<sup>2</sup> is represents aminopropyl group, or a salt thereof; and at least one N-alkyl polyamine compound represented by the following formula (II):

, wherein R is a C<sub>8-22</sub> saturated or unsaturated aliphatic hydrocarbon group and n is an integer from 2 to 4, or a salt thereof in an amount of 0.1 to 9 parts by weight to one part by weight of the compound (I).
