- with sequence listing part of description (Rule 5.2(a))

- (54) **Title:** METHODS AND KITS FOR DETECTING ENDOTOXIN

FIG. 6C

- (57) **Abstract:** An improved amebocyte lysate-based method for the detection of endotoxin is described. The method requires only a single incubation step and permits the use of various sample input volumes, allowing for greater flexibility while maintaining sensitive detection of endotoxin at concentrations ranging from 0.01 to 10 endotoxin units (EU)/mL. Kits for performing the endotoxin detection method are also described.
