A TABLE UNIT FOR FOOD PROCESSING

ABSTRACT

An object of the present invention is to provide a table unit (1) for food processing whereby the deterioration of foods during the processing works can be prevented when conducting the food processing, and the working environment can be improved. The table unit (1) for food processing according to the present invention comprises a unit body (3) which is composed of an insulated wall (2), a cooling system (6) stored in the unit body (3), chopping boards (5) fixed to the upper face of the unit body (3) in an easily installable and removable way, a cold air supply means for supplying cold air from the cooling system (6) to the upper part above the chopping boards (5), and a cold air intake means (11) for absorbing the cold air into the unit body (3) from the circumference of the chopping boards (5).
