(54) Title: METHOD FOR TRAFFIC MANAGEMENT IN A WIRELESS NETWORK SYSTEM

Fig. 4

(57) Abstract: The present disclosure relates to a method for traffic management in a wireless network system, the method comprising: identifying a mobile device that is outside its home network and accepted into the wireless network system based on at least one predetermined parameter; and reducing the data transfer rate allowed for the identified mobile device, wherein reducing the data transfer rate comprises reducing the data transfer rate of the payload data, and/or preventing the communication between the identified mobile device and the home network of the mobile device.
