(54) Title: DOOR LOCK

FIG. 3

(57) Abstract: The deadbolting means of the lock according to the invention comprise a locking piece (15) to establish and release the locking of the deadbolting means in the deadbolting position. The locking piece is pivotably supported on the lock body (3) and comprises a mechanical control part (19) and at least one electrical control part (20A, 20B). The mechanical control part is functionally linked to a mechanical controller. The electrical control part is functionally linked to an electric actuator.
