S210 Display a workflow interface in response to operation on a target control in an online table

S220 Receive a trigger condition and a trigger operation on the workflow interface

S230 If the trigger condition specifies to trigger on the basis of preset time, execute the trigger operation according to the preset time

S240 If the trigger condition specifies to trigger on the basis of time recorded in the online table, execute the trigger operation according to the time recorded in the online table

(57) Abstract: The present invention relates to a table processing method and apparatus, an electronic device, a medium, and a program product, applied to the technical field of computers. The method comprises: displaying a workflow interface in response to an operation on a target control in an online table (S210); receiving a trigger condition and a trigger operation on the workflow interface (S220), the trigger condition being associated with data content or time of the online table, and the trigger operation being associated with data content or a target object of the online table; if the trigger condition specifies to trigger on the basis of a preset time, executing the trigger operation according to the preset time (S230); or, if the trigger condition specifies to trigger on the basis of time recorded in the online table, executing the trigger operation according to the time recorded in the online table (S240). The present invention can improve the setting flexibility of trigger time, such that the requirements of more service scenarios can be satisfied.

本国际公布:

— 包括国际检索报告 (条约第21条(3))。

(57) 摘要: 涉及一种表格处理方法、装置、电子设备、介质及程序产品, 应用于计算机技术领域, 方法包
括: 响应于对在线表格中目标控件的操作, 显示 workflow 界面 (S210); 在 workflow 界面接收触发条件和触
发操作 (S220), 触发条件与在线表格的数据内容或者时间相关联, 触发操作与在线表格的数据内容或
目标对象相关联; 如果触发条件是基于预设时间进行触发, 则根据预设时间, 执行触发操作 (S230);
或者, 如果触发条件是基于在线表格中记录的时间进行触发, 则根据在线表格中记录的时间, 执行触
发操作 (S240)。可以提高触发时间设置的灵活性, 以满足更多业务场景的需求。
