(54) Title: METHOD AND APPARATUS FOR LIMITING CURRENT TO HIGH FREQUENCY ALTERNATING CURRENT TO VOLTAGE REGULATOR MODULES

(57) Abstract

A high frequency alternating current (AC) voltage regulator module (VRM) includes a protection circuit that regulates a level of current from power in a high frequency AC domain received from an AC bus. A post-regulator unit is coupled to the protection circuit. The post-regulator unit regulates the power to a component on a computer system.
