(54) Title: HEATING DEVICE, HEATING ELEMENT AND AEROSOL GENERATING PRODUCT

Figure 2I

(57) Abstract: The disclosure relates to a heating device suitable for heating an aerosol generating substrate without combusting the aerosol generating substrate, the heating device comprises a mouthpiece adapted for a user to consume aerosol generated by the aerosol generating substrate; a substrate holder for receiving an aerosol generating substrate; a heating element shaped and dimensioned to heat the aerosol generating substrate to produce aerosol; an aerosol delivery channel positioned to receive aerosol generated from heating the aerosol generating substrate and to direct the aerosol towards the mouthpiece; and a filter holder for receiving at least one consumable filter, the filter holder positioned proximate the mouthpiece in a manner such as to filter particulates from the generated aerosol before consumption.
