

Claims

1. A compound having formula (I)

a stereoisomeric form, a pharmaceutically acceptable salt, solvate or polymorph thereof, wherein the compounds are selected from the group comprising:

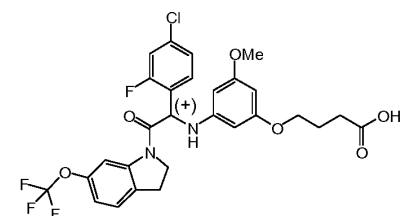

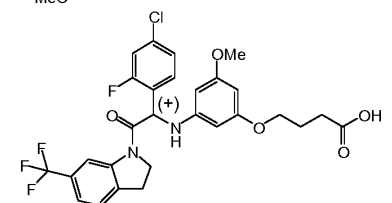

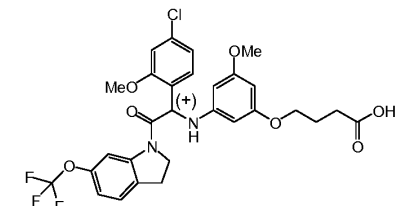

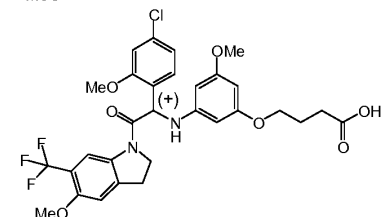

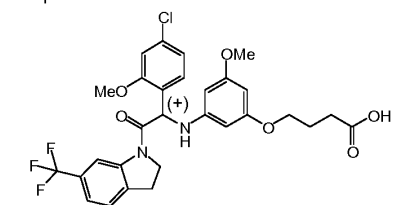

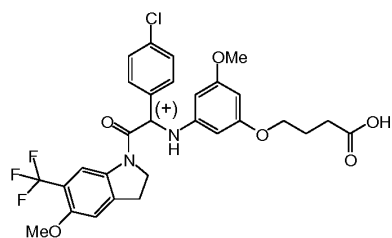

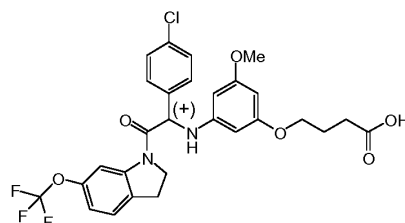

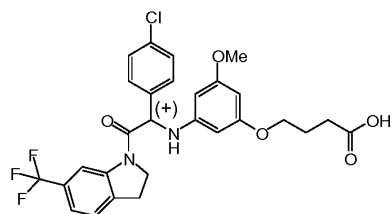

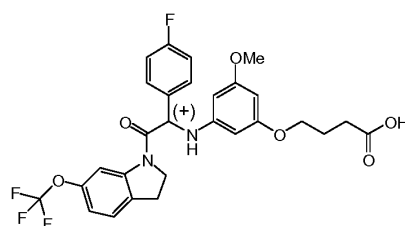

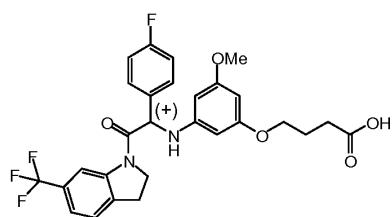

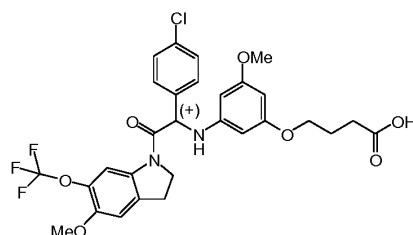

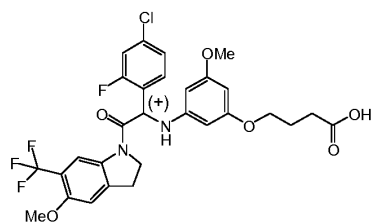

- 5 2. A pharmaceutical composition comprising a compound according to claim 1 or its stereoisomeric form , a pharmaceutically acceptable salt, solvate or polymorph thereof together with one or more pharmaceutically acceptable excipients, diluents or carriers.
- 10 3. A compound according to claim 1 or its stereoisomeric form , a pharmaceutically acceptable salt, solvate or polymorph thereof or a pharmaceutical composition according to claim 2 for use as a medicament.
- 15 4. A compound according to claim 1 or its stereoisomeric form, a pharmaceutically acceptable salt, solvate or polymorph thereof or a pharmaceutical composition according to claim 2 for use in the treatment of dengue.
- 20 5. A use of a compound as represented by any of the structural formula from claim 1, a stereoisomeric form, a pharmaceutically acceptable salt, solvate or

polymorph thereof comprising a mono- or di-substituted indole group for inhibiting the replication of dengue virus(es) in a biological sample or patient.

6. The use of a compound according to claim 5 further comprising co-administering an additional therapeutic agent.
7. The use of claim 6 wherein said additional therapeutic agent is selected from an antiviral agent or dengue vaccine, or both.
8. The compound as claimed in claim 1 wherein the compound is

or a pharmaceutically acceptable salt, solvate or polymorph thereof.

9. A pharmaceutical composition comprising a compound according to claim 8,
5 a pharmaceutically acceptable salt, solvate or polymorph thereof together
with one or more pharmaceutically acceptable excipients, diluents or carriers.
10. A compound according to claim 8, a pharmaceutically acceptable salt,
solvate or polymorph thereof or a pharmaceutical composition according to
10 claim 9 for use as a medicament.
11. A compound according to claim 8, a pharmaceutically acceptable salt,
solvate or polymorph thereof or a pharmaceutical composition according to
claim 9 for use in the treatment of dengue.
15
12. A use of a compound as represented by any of the structural formula from
claim 8, a pharmaceutically acceptable salt, solvate or polymorph thereof
comprising a mono- or di-substituted indole group for inhibiting the replication
of dengue virus(es) in a biological sample or patient.
20
13. The use according to claim 12 which use further comprises co-administering
an additional therapeutic agent.
14. The use according to claim 13 wherein said additional therapeutic agent is
25 selected from an antiviral agent or dengue vaccine, or both.
