(54) **Title**: SYSTEMS AND METHODS FOR DATA PATH CONTROL IN A WIRELESS NETWORK

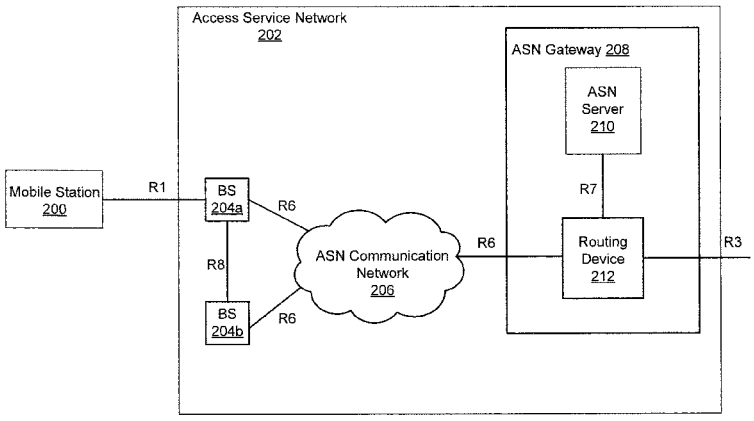

FIG. 2

(57) **Abstract**: In various embodiments, the data plane may be abstracted from a control plane in a wireless network such as WiMax, WiFi, LTE or the like. In some embodiments, a method comprises a receiving control data at a control server from a source device, generating routing instructions at the control server regarding routing network data based on the control data, providing the routing instructions to a routing device, configuring the routing device based on the routing instructions, receiving network data from the source device, and routing the network data from the source device to a target device using the configured routing device.
