

A B S T R A C T

THROWAWAY WEARING ARTICLE FOR DISPOSAL OF BODILY DISCHARGES

5 A throwaway wearing article for disposal of bodily
discharges improved so that a cylindrical guide for bodily
discharge can be brought in close contact with a zone
surrounding the anus without use of an adhesive. A flat
bag-like receptacle 15 is formed on its upper sheet 26 with an
10 inlet means 23 having the cylindrical guide 29 adapted to guide
bodily discharge such as loose passage into a receptacle 15.
An elastically stretchable supporting member 20 extending
under extension between front and rear sections 21, 22 of the
receptacle 15 is operatively associated with a peripheral edge
15 of the upper end of the cylindrical guide 29.

Refer to Fig. 2.
