(54) Title: AIR IONIZER

(57) Abstract: An air ionizer (10) to distribute negative ions and/or ozone to the surroundings, receive and retain each electrode module within the casing in a replaceable/interchangeable manner. The electrode module is slidable into the holder so as to connect the module to a control unit (14) which supplies high voltage to its electrodes to control the level of generation of negative ions and/or ozone. The module may be one of several types and the type of module inserted is identified by interaction with the ionizer.
