

ABSTRACT

An interface display method and apparatus, an electronic device, a storage medium, and a program product are provided. The method comprises: in response to an interface display operation for a preset interface, displaying the preset interface, and displaying, in the preset interface, at least one recommended component corresponding to a current account, the recommended component being an interface component recommended to be added to the preset interface (S101); and in response to a preset triggering operation for the recommended component, executing an interaction event corresponding to the recommended component triggered by the preset triggering operation (S102). The present technical solution can enrich the components displayed on the preset interface and the manners of interaction of the components.
