MINING METHOD AND DEVICE BASED ON BLOCKCHAIN, AND COMPUTER READABLE STORAGE MEDIUM

ABSTRACT OF THE DISCLOSURE

The embodiments of the invention relate to a mining method and device based on a blockchain, and a computer readable storage medium. The method comprises: acquiring behavior data of at least one user within a cycle; determining a value corresponding to each user in the at least one user within the cycle according to the behavior data of the at least one user and a value of a rated quantity within the cycle; and recording an identifier, the behavior data and the value of the at least one user within the cycle in the blockchain, so as to realize more reasonable and more resource-efficient mining.
