

Location-independent ingestion control

Abstract

The invention relates to a method for monitoring compliance with therapy prescribed by an aP, characterized by the following steps:

- registering the pC in the blockchain (100);
- identifying the exterior packaging by means of a first code (110);
- scanning of the first code by the dispensing point (120);
- linking the patient data to the data of the aP (130);
- starting of an application software by the patient (140);
- scanning the first digital code (150);
- starting the video recording (160);
- ending the video recording (170);
- transmitting the video recording to the aP (180);
- validating the documented ingestion (190).
