

Title of the Invention: COSMETIC APPLICATOR DEVICE AND THE LIKE

ABSTRACT

The present invention relates to a cosmetic applicator device for applying a composition, comprising a brush member (10), wherein the brush member (10) comprises an elongated core (11) and a plurality of twisted blade members (12); wherein each twisted blade member (12) is configured to comprise: a fixed edge (121), wherein the each twisted blade member (12) is attached at the fixed edge (121) onto the elongated core (11), a free edge (122), a root end (123), and a tip end (124); wherein there is a first continuous twist (125) between the root end (123) and the tip end (124), and the fixed edge (121) is configured to be spirally located around the elongated core (11) from the root end (123) to the tip end (124). The plurality of twisted blade members (12) is operable improve the overall elasticity of the brush member (10) and configured to create multiple blade intervals (13) to stably retain the cosmetic products therein, as well as to efficiently transfer the cosmetic products onto the intended surfaces of human body such as lip, eyelashes and eyebrows.
