(54) Title: GASKET AND ENDBLOCK FOR SEPARATION MODULE

(57) Abstract: Systems for water treatment are disclosed. The systems include a housing, at least one endblock dimensioned to be positioned within the housing, and a gasket having a face and a lip extending from the face, the face dimensioned to be positioned between the endblock and an active area of the water treatment, and the lip dimensioned to be positioned over an outer edge of the endblock adjacent to the housing to form a seal. The system also includes an o-ring dimensioned to be positioned between the lip and an internal side of the housing. The gasket and o-ring are rated in operation to withstand a static pressure of at least up to 100 psi.
