

ABSTRACT

Provided are [1] a polyfunctional (meth)acrylate thioester
 composition containing a polyfunctional (meth)acrylate thioester
 5 compound (A) represented by Formula (1), [2] a curable
 composition containing the polyfunctional (meth)acrylate
 thioester composition [1], [3] a cured product obtained by
 curing the curable composition [2], [4] a molded body including
 the cured product [3], and [5] an optical material including the
 10 molded body [4].
