(54) Title: OPHTHALMIC PHARMACEUTICAL COMPOSITIONS CONTAINING DORZOLAMIDE, METHODS FOR THEIR PREPARATION, AND FOR THEIR USE

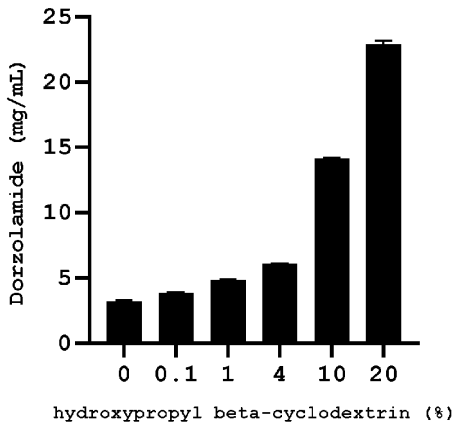

FIG.1

(57) Abstract: The present invention provides ophthalmic pharmaceutical compositions for the treatment of IOP which are prepared by a specially designed method of preparation that allows the known active pharmaceutical ingredients (APIs) and their salts to be treated in such a way that a sufficiently stable base-type form of the active ingredients is produced and then introduced to different carrier matrixes which produces a final product that is stable at critical pH values and allows the use of APIs concentrations never explored before with adequate bioavailability and avoiding all of those side effects collectively known as "burn sensations".
