

INFORMATION PROVIDING DEVICE, INFORMATION PROVIDING METHOD, AND STORAGE MEDIUM

ABSTRACT

5 The present invention is to reduce an unnecessary action, an unnecessary process, etc., generated in a situation for iris data acquisition. This information providing device is provided with: a reception unit that receives a face image; a determination unit that determines whether a human captured in the face image is not suited for iris data acquisition on
10 the basis of the face image; and an output unit that, when it is determined that the human is not suited for the iris data acquisition, outputs information based on the determination that the human is not suited for the iris data acquisition.
