(54) Title: SYSTEM AND METHOD FOR PRESSURIZING A PLASTIC CONTAINER

(57) Abstract: A system for manufacturing a plastic container, including a thin-walled container, includes an actuator and a base unit. The actuator may include a body portion and a holding/securing member configured to hold or secure a portion of a container. The base unit includes a heating surface and may optionally include an insert. In an embodiment, the actuator may be configured to apply a force or pressure on a container to contact the base unit, the base unit may be configured to receive a base portion of the container, and the heating surface may be configured to convey energy or heat to a portion of the base portion of said container. Embodiments of a method for providing a plastic container are also disclosed.
