(54) Title: AUTOMATIC MODULAR STORE

(57) Abstract: An automatic store comprises a main support structure (11, 12), at least one storage unit (13) with a stowage member (14) which extends along an endless path, and storage elements (17, 18) mounted on the stowage member and movable along the endless path as a result of an activation of the storage unit (13) in order selectively to reach a collection position in which collecting means can collect products stored on predetermined storage elements. The storage elements define stowage locations which are identified by a set of at least three coordinates and are movable along at least one predetermined path.
