(54) Title: GAS TURBINE ENGINE WITH FAN VARIABLE AREA NOZZLE

(57) Abstract: A nacelle assembly for a high-bypass gas turbine engine according to an exemplary aspect of the present disclosure includes a core nacelle defined about an engine centerline axis, a fan nacelle mounted at least partially around the core nacelle to define a fan bypass flow path for a fan bypass airflow, and a fan variable area nozzle axially movable relative the fan nacelle to vary a fan nozzle exit area and adjust a fan pressure ratio of the fan bypass airflow during engine operation, the fan variable area nozzle operable to vary the fan nozzle exit area by about 20%.
