(54) Title: DIVIDABLE TRAY

(57) Abstract: Packages for housing consumable products or secondary containers having consumable products and methods of making and using same are provided. In a general embodiment, the present disclosure provides a tray having first and second opposing side walls, a front wall, a back wall, a bottom wall, and an interior wall that divides the tray into at least two separate compartments. The interior wall may include first and second adjacent panels joined by one of a perforation and a score. The perforation and/or score will allow the tray to be configured, at least, as one tray having two separate compartments, or as two separate and discrete trays.
