(54) Title: METHOD AND APPARATUS FOR DATA PROCESSING

(57) Abstract: The invention relates to data processing methods and systems including: a method of database replication in which information strings are assigned to serialisation groups for processing. A method of memory management in which data is read from a storage space area whilst no data is written to it. A method of replicating a database in which a dynamic table is created to provided processing information for database members. A method of replicating a database wherein tasks are allocated to program components without program components interacting.
