ABSTRACT

"Route reservation method"

The invention relates to a method (200) for reserving a journey, within the framework of an installation (100) for the automated rental of vehicles, in particular electric vehicles, comprising a plurality of sites (104), said method (100) comprising a step (202) of selecting an arrival position (322) automatically initiating the following steps:

- automated determination (206) of a departure position;
- automated identification (208) of a departure site that is the closest to the departure position; and
- automated identification (210) of an arrival site that is the closest to the arrival position; and

said method (200) also comprising a step (212) of storing at least one reservation data for said departure site (310) and at least one reservation data for said arrival site (324).
